

# MARCO WOLF

Principal R&D/Product DVL Engineer

Marco Wolf joined TE in 1999 as Product Engineer and held various Engineering and Technical Marketing functions in Automotive Sensors Product Line.

2012 he became head the Advanced Engineering Automotive Sensors before he joined 2018 the Hybrid and E-Mobility Solutions (HEMS) as Principal Field Application Engineer.

In this Position he supports internal and external customers with system expertise and technical simulation for Thermal Management and Electro- Magnetic Interference (EMI) in High-Voltage Systems and Architectures.
