

# OLAF LORENZ

Manager Field Application Engineering

Olaf Lorenz is Manager of the Field Application Engineering team for Automotive Relays and Contactors in EMEA at TE Connectivity Germany GmbH (TE) and located in Berlin.

His team is responsible for the technical contract review and product validation of automotive relays and contactors and supports the customers in EMEA in all technical questions.

He started in 1996 as application engineer for automotive relays and was responsible for many automotive OEMs and 1st Tiers as well as Truck and Busses OEMs. In 2019 he took over the management role of the application engineering team.

He has published several technical papers, amongst other things in the Engineer's Relay Handbook and the German trade journal Elektronik Praxis.

Olaf Lorenz holds a degree in electrical engineering (Dipl.-Ing.) and has more than 25 years experience in automotive switching technologies.
